Excerpt: . . . at once administered by Dr. Radcliffe. Grasping the heel and foot, while Dr. Ashford made counterextension, I drew the foot strongly downward, and attempted external rotation without effect. The parts were absolutely immovable by any force at our command. While continuing our efforts, I perceived evidence of returning consciousness and muscular rigidity, and at once desisted until complete relaxation was effected by further etherization, when a renewal of the manipulations was more fortunate, the tibia resuming its normal position with an audible snap, while the astragalus was forced back into its bed on the os calcis. The head of the astragalus, however, still remained resting on the cuboid, or rather, partly on that bone, and partly on the external cuneiform. Rather forcible extension of the foot, with pressure upon the neck of the astragalus, readily carried the head of that bone backward and downward...

Totally one of the better pdf I have at any time read through. It really is simplified but shocks within the 50 % from the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
